

BRANDON FOX

44 W 444 N, Apt 333, Woods, UT •(222)222-4433
brandon.fox@foxy.com

Seeking a full-time position in security engineering. Enthusiastic learner, adaptive, and self-motivated worker. With experience securing cloud infrastructure via automated guardrails, I'm passionate about helping businesses innovate and thrive with proven security practices.

EXPERIENCE

MAY 2021 – PRESENT

CLOUD SECURITY ENGINEERING INTERN, NU SKIN ENTERPRISES

- Design and develop Python based security automations for cloud infrastructure
- Program guardrails in AWS to enable developers to produce secure, fast-speed feature delivery
- Create internal security tools and libraries for efficient development of cloud controls
- Write security standards to guide business in secure cloud infrastructure
- Secure deployment pipelines to shift-left in security posture
- Design and implement a complex multi-process pipeline used to identify owners of cloud resources
- Develop automation to automatically remediate overly exposed network ports in AWS
- Create cost-saving automation to decommission inactive IAM resources and reduce attack surface
- Create risk map for cloud misconfigurations to translate into high-level risk management categories
- Evaluate Infrastructure as Code frameworks which best match Nu Skin's deployment strategy at the best ROI
- Manage application configuration deployment and maintenance strategy, reducing overhead and increasing configurability of security automations

SEPTEMBER 2021 – APRIL 2022

SENIOR CAPSTONE PROJECT, ALIANZA, INC

- Design and develop an automation tool for capturing cloud infrastructure artifacts for SOC2 Type 2 security audits
- Orchestrate agile project management

APRIL 2020 – PRESENT

SYSTEM ADMINISTRATOR, BRIGHAM YOUNG UNIVERSITY

- System administrator team lead
- Design trainings for and train new sysadmin employees to provide state of the art technologies with maximum up-time for the BYU Department of Chemistry
- Manage sysadmin projects to ensure timely progress and valuable results
- Write Python scripts to automate processes

- Deploy and manage automated imaging and configuration management system for department computer lab
- Manage network, servers, and computers to ensure efficient communication and functioning systems

EDUCATION

APRIL 2022

BS IN CYBER SECURITY, BRIGHAM YOUNG UNIVERSITY

Currently pursuing a bachelor's degree in cyber security. Planned graduation in April 2022.

Coursework experience includes:

- Computer Programming
- Web Technologies and Development
- Threat Detection and Response
- Digital Forensics
- Incident Response
- Computer Networks, Systems, OS
- Database Application and Management
- Penetration Testing
- Risk Management
- Technology Governance

VOLUNTEER EXPERIENCE

Spent two years in northern Argentina as a volunteer representative for The Church of Jesus Christ of Latter-Day Saints.

- Became fluent in the Spanish Language
- Led groups of 10-15 missionaries
- Assisted local church leaders in their duties
- Trained new missionaries
- Taught and served local community members

SKILLS

- AWS Security
- IaC Development and Deployment
- RHEL Server Administration
- Python Automation Scripts
- Salt Stack Administration
- SOC2 Type 2 Audit Compliance
- CI/CD Deployment Pipelines
- GitLab Version Control
- Virtualization Environments
- Agile Project Management
